

Pure Defender - DIN #02362546

If a product does not have a DIN# you cannot rely on that product to be safe for use.

Pure Defender is a Health Canada and EPA registered disinfectant/sanitizer that is effective against a large spectrum of bacteria and viruses. Non irritating to skin and safe for a majority of surfaces. To apply Pure Defender spray target surfaces and let it air dry or wipe after a few minutes to achieve best results.

DILUTION RATES:

Do not dilute if intended use is disinfection.

For sanitizing dilution rate 1:2 up to 1:5 is permitted depending on the surface being treated.

Fogging application dilution rate is 1:10.

INDUSTRY USE:

Pure Defender is used in education facilities such as schools, colleges and day cares. Food processing industries for washing work benches, cleaning raw food supplies. Health care – hospitals, nursing homes, dental offices, laboratories, physical therapy clinics, medical clinics and pharmacies. Public use – gyms, hair salons, busses, trains, restaurants, ferries, boats and libraries. Agriculture and veterinary – animal kennels and exam rooms.
